HABITAT ENTERPRISES | OFFSETID TEAM LEADER

WHAT WE DO

Habitat Enterprises ("Habitat") is a pioneering carbon asset development firm with a strong track record in the low carbon marketplace. Habitat is building a portfolio of carbon offsets by providing carbon finance and offset certification to capital projects that reduce methane gas, which is 21 times as harmful to the atmosphere as CO₂. Its activities aim to make the world's environment cleaner while delivering attractive financial returns to its project partners and investors.

Habitat makes methane reduction projects profitable and makes more methane reduction projects happen. Habitat finds projects that could reduce methane emissions in large quantities and partners with the project developers or organizations developing the project early in the project cycle. Habitat invests in certifying the carbon reductions as carbon offsets and secures a buyer for the carbon offsets – adding an additional revenue stream to the project while securing a stream of carbon offsets to its portfolio. Through its technology, capital, and engineering partnerships, Habitat also structures project finance and provides anaerobic digester design to certain projects.

The team at Habitat Enterprises consists of leading talent in emissions markets and carbon finance who are driven by the opportunity to lead a fundamental transition in the global economy. Together, we are demonstrating the financial opportunity associated with the low carbon economy, and convincing more and larger investors to enter this sector.

OFFSETID

OffsetID is a proprietary offset project identification and assessment platform that allows users (clean technology firms, investors, project developers, and companies) to find out if a project or technology has the potential to earn carbon offsets. For investors and project developers seeking new offset opportunity, OffsetID is a simple offset deal flow and portfolio management tool for finding, tracking, and analyzing new offset projects/investments.

OUR VISION

The solutions to climate change involve governments, international organizations, the general public – and private capital. Habitat Enterprises is driven to channel significant amounts of capital into the solutions to climate change.

Our vision has created a working culture that is shared by our employees, advisors, partners, and Board of Directors, made up of a dedicated commitment to fighting climate change in cooperation and using our diverse skill sets, a strong spirit of entrepreneurship, and a shared desire to make a difference.

THE ROLE | OFFSETID TEAM LEADER

The OffsetID Team Leader will lead the testing of OffsetID with a trial user in a four-month Canadian Government funded platform trial. At the same time this person will begin the commercialization process of the platform through partnership/user generation. He or she will work with the proven and experienced team of software and carbon experts at Habitat and its platform trial partner. The role will primarily focus on management of the platform development process and business development activities, as below. After the 4-month trial it is intended that the OffsetID Team Leader will become full time lead of the OffsetID project within Habitat.

The OffsetID Team Leader will be responsible for the following activities from September 15 – December 15 2010.

Activities	Time Requirement	Description
Software team management	6 hours/week	Manage the team working to develop and test the platform
Development partner interaction	6 hours/week	Interact with the development partner to answer questions, make improvements and provide feedback to the software team
Business development	6 hour/week	Identify prospective users or partners for the platform and build/manage relationships with these parties
Total:	Approx 18 hours/week	Minimum 2 day per week time commitment is required. Time will be variable, with some weeks requiring more than 18 hours, and some weeks requiring less time.

KEY BENEFITS TO JOINING HABITAT

- Collaborate with an accomplished, fun, and entrepreneurial team, board, and investors
- Gain exposure to the carbon market and contribute to large scale carbon reduction
- Oversee development of a first of its kind carbon asset identification/valuation platform
- Potentially earn an equity position in a quality early stage company with significant growth potential

REMUNERATION

Habitat Enterprises offers a remuneration package for this position comprising of a blend of cash & stock options (dependant on experience and preference) plus performance bonuses.

APPLICANT REQUIREMENTS

The successful candidate will have a background in one or more of the following:

- Ecommerce site development and commercialization
- Software design and deployment
- Product, ecommerce or software savvy business development managers from other sectors (i.e. product development, research and development, etc.)
- Carbon finance / carbon IT

Other requirements:

- Entrepreneurial and business development experience
- Reside in Vancouver, BC
- Be open to becoming an employee of Habitat
- Love working in a fast-paced entrepreneurial environment
